Report on Educational Tour to Vijapur Fort Dome, Vijapur, Karnataka State

Date: 26/02/2019

Aim: The aim of the educational tour is to study sound which is produced in dome gets reflected throughout the dome hence producing an echo of a minimum of three to fourfold during a second

The department of Physics and Electronics conducted one day educational tour to Vijapur Fort Dome, Vijapur, Karnataka State on dated 26/02/2019 for B.Sc. third year students. Total 15 students and 4 faculty members were participants. The main purpose of the tour was to get familiar with reason for the production of multiple echoes in Golghumat at Vijapur..

Vijapur, Karnataka State is a place where Golghumat is situated which is near about 200 Km away from Ausa. We started at 6:00 am form Azad Mahavidyalaya, Ausa and reached at 11:30 am.

One of the most significant features of the Gol Gumbaz is its central dome which stands without the support of pillars and it is the second largest dome in the world after St. Peter's Basilica in Rome. The sound which is produced here gets reflected throughout the dome hence producing an echo of a minimum of three to fourfold during a second. If the surroundings inside the architecture are very quiet, then one could even hear the echo for at least 7 to 10 times.

The students were practically heard the reflected sound echo for at least 7 to 8 times. The system is best designed such that you'll even hear the tick of a watch across a distance of about 37 meter within the vast dome

Outcome: The students experienced practically the echo of sound.
